SOFTWARE ENGINEER

Freelance full-stack web developer with experience using Ruby on Rails, React, Node.js, and Python. Completed SWE Immersive Bootcamp. Quick to learn new skills. Background in logistics and management. Seeking full-time full-stack software engineering role.

TECHNICAL SKILLS

Languages: Javascript ES6, Ruby, Python, HTML, CSS, SQL/noSQL

Frameworks: Ruby on Rails, NodeJS, Express, React, Jest, RESTful Development, Bootstrap, OAuth, SASS, Web API

Software + Platforms: AWS, Git, Linux, MacOS, Windows, Vim, VS Code, Atom, Photoshop

TECHNICAL PROJECTS

The Board - [Github](#) | [Demo](#)

Dispatching application for courier companies to manage couriers, clients and deliveries

- Developed a clean, efficient React UI on a robust Rails back-end to give dispatchers a clean overview of live work, as well as to quickly sort, search and edit the information they are looking at.

ArrowJournal - [Github](#) | [Demo](#)

Virtual planner and task manager

- Developed a virtual planner to mimic a physical paper journal. Users can create an account to persist their entries via a MySQL database. Tasks and events are rendered and modifiable across various views.

Punchr - [Github](#)

Punch clock application for managing employee shifts

- Developed a simple web application using React.js allowing employees to open and close their work shifts using a 4-digit pin
- User permissions allow employees to view their shift history and for managers to view or modify all shift histories

EXPERIENCE

Piece O' Pizza

Owner/Operator

Wakefield, MA

10/2018 - 03/2020

- Part of a small team remodeling and opening an old pizza restaurant
- Managed employee hiring, scheduling and role delegation
